just dealing. To that end we copy the following from the New York Courier and Enquirer, which sustains the administration as firmly as it ever sustained Wm. H.

From the New York Courier and En introatant race Washington.—We received last night from an occasional correspondent the following very interesting and important communication from Washington, and have good reason to believe its entire

Washington, July 10, 1854.

Mr. Webster has tendered his resignation as Secretary of State to President Fillmore within the last few days. This movement grew out of no change in their relations, or difference of views on any public question, but because the condition of Mr. Webster's health requires a programment of the paragraph of the department for this purpose without giving President Fillmore the opportunity of consulting his own discretion.

The President urged Mr. Webster very strongly to remain his position, consenting to any arrangement that he might desire to adopt. Mr. Webster will accordingly sail for Europe about the middle of August, and remain shroad until near the time of the meeting of Congress; and in order to relieve all embarrassment in regard to immelf, he will leave his resignation in the hands of the President, to be acted upon as the best judgment of the atter may decide.

There is no interruption of any kind between these WASHINGTON, July 10, 1854.

ay decide.

is no interruption of any kind between these ten, or between Mr. Webster and any member of inct. The facts are stated as they occurred, and terms, to prevent all misapprehension.

to say about it; but we feel that we are doing nothing more than a simple act of justice in publishing and call-

WASHINGTON, July 12, 1851.

To the Editor of the Union: Sin: I hope you will, through your paper of to-morrow, allow the earliest opportunity that can be afforded
to me, on my return to this city, to contradict the unfounded and slanderous reports which have been circulated during the temporary absence of my brother, Dr. G.
A. Gardiner, in relation to the award made in his favor
by the board of commissioners under the treaty with
Maxico.

A Gardiner in relation to the award made in his favor by the board of commissioners under the treaty with Mexico.

It has been alleged that Mr. Port had stated that my brother had confessed or declared that he had obtained his award by false or forged evidence. Mr. Port—who is now in this city—utterly and indignantly denies this show just returned from the country, where a dreamed by him to me, and which I received em my arrival have passed a lew days in a pleasure a recursion; and great has been my surprise on learning through a friend what has been my s

In Sumford, Connecticut, on the night of the 4th, some persons loaded an old 12-pounder cannon to the muzzle, and fired it off with a slow match. It burst, and one piece of the metal, weighing thirty pounds, was thrown 500 yards, through the roof of a house and the side of a water-tank, flooding the house with water; another "junk," of nearly married to a farmer, one day visited the cowhouses, flooding the house with water; another "junk," of nearly when she thus interrogated her milkmaid: "By the-by, 190 lbs. weight, was thrown 950 yards, and through the roof of a bed-room floor of another house, narrowly missing a man in bed Mr. R. Gage was sitting within six feet of the gun at the time of the explosion, and, strange to say, in the midst of the storm of iron he was untouched.

How Elisha H. Allen, United States consul at the San will return to the Islands, arrived at Boston a few days since. He will return to the Islands in a few weeks.

The eccentric movements of the fixed star Sirius, as described below, are so extraordinary that we should agant epithets as it ever hurled anathemas at his head while Secretary of State to Mr. Tyler. scarcely credit the account but for the fact that it appears the phenomenon himself, and has no doubt of the fact stated. Considering the immense distance of the fixed stars from the earth-so great that the diameter of the earth's orbit is but a span in comparison—it would seem to baffle all human calculations to account for these eccentric movements. It is impossible to conceive what influences could have caused this fixed star to deviate from its ences could have caused this fixed star to deviate from its place so far as to be visible to the naked eye. If such movements were common among these luminaries, it would cast a reasonable doubt on the whole established theory of the fixed stars as understood by astronomers. Of late years the astronomers of all the observatories in Christendom have been interested in searching for new planets, and their diligence has been rewarded by signal success in the development of new planets, the most re-markable of which is the discovery by Le Verrier of the great planet Neptune. In consequence of this announce ment from the Berlin Academy of Sciences, all the astron omers of Europe and America will doubtless pay especial

gentiemen, or between Mr. Webster and any member of the cabinet. The facts are stated as they occurred, and in plain terms, to prevent all misapprehension.

AN OBSERVER.

The Gardiner Claim.

We have seen for two weeks past in our exchanges notices of this claim, and charges of fraud with respect to it. We have also seen statements purporting to present the substance of evidence given before the grand jury in this city, which holds its sessions in secret. It is commendable in a public journal to use every exertion to give early information of matters of public concern; but we have not that degree of vanity which can induce us, in order te get shead of our cotemporaries, to give currency to grave charges, unless we have some knowledge of the foundations on which such charges rest. We know nothing of Doctor Gardiner, and nothing but what we have gathered from common rumor as to the justness of his claim. The matter is now, we understand, undergoing a legal investigation. In the mean time, we shall have nothing to make a should be a substance of the common rumor as to the justness of his claim. The matter is now, we understand, undergoing a legal investigation. In the mean time, we shall have nothing to make a should be a substance of the gard and the proper class of the gymnasium, and Mr. Thugutt, a sadder, both certified to be reliable persons. The family of the latter also beheld the phenomenon Mr. Keune, with his head leaned immoveably against a wall, saw Sirius head leaned immoveably against a wall, saw Sirius head leaned immoveably against a wall, saw Sirius head generally again sink out of sight behind it, and then again appear. Its motions were so considerable that for some time the beholders thought it was a lantern suspended by a kite. It also varied in brilliancy, growing alternately brighter and fainter, and now and then being for moments quite visible, though the sky was perfectly elean. As far as it is known, this phenomenon has been remarked but twice before—once in 1799, from the Peak of Teneriffe, ECCENTRIC MOVEMENT OF THE FIXED STARS.—At fifty years later, by a well-initialized as fifty years later. We well-initialized as fifty years later, by a well-initialized as fifty years later. We well-initialized as fifty years later as fifty years later as fifty years later. We will not be a server of the property o

ing attention to the following letter of J. C. Gardiner, each, a brother of Doctor Gardiner, which imbodies a translation of a note written by Mr. Port, whose name has been used in most, if not all, the statements impeaching Doctor Gardiner's integrity and the claim which he has been paid.

THE POSTAGE LAW.—The construction given the new postage law by the Assistant Postmaster General meets with the almost unanimous opposition of the press. Under this decision, the postage on a single copy of some of learners of the postage of the postage of the claim which he has been paid.

this question:

"How is it in relation to regular subscribers, who merely wish the direction of their paper changed 1 Are they to be charged transient raies, and their papers withheld in the office here till prepayment is made ? Many of them have already paid a quarter's postage in advance at the places they reade. Must they exhibit the receipt for this payment? How, indeed, is the postnasser to know who are bons fets subscribers for less than three months? I every way we turn it, the case is involved in difficulty—and all from attempting to make a distinction between one kind of subscribers and another, when no such distinction exists, as all subscribers, whether for one month or twelve months, are bons fide subscribers.

[Baltimore Clipper.]

Hon. Elisha H. Allen, United States consul at the Sandwich Islands, arrived at Boston a few days since. He will return to the Islands in a few weeks.

Here will we sit,
The while the son goes down the glowing west,
And drink the balmy air
Exhsting from the meadows; the necturous breath
Which Earth sends upward when her lord, the Sun,
Kesses her cheek at parting."

Kesses her cheek at parting."

There is action as well as vitality in this beautiful
mile. Shakspeare paints similarly when he says:

simile. Shakspeare paints similarly when he says:

"How soft the moonlight sleeps upon yon bank!"

Now, suppose he had written "rests upon yon bank,"
how tame in comparison would the word have been; and
yet it would be equally "correct." What is it that
gives to the following line from Campbell's "Battle of
Hohenlinden" its almost terrific force but a single word?

"Far flashed the red artillery!"

mouthed ordnance. Wherefore, ye minor bardlings, look to your accessories.—Harper's Magazine.

The memories of childhood, after a mature age has been attained, are more powerful than many people are aware of. And especially is this the case in reference to the religious observances which first arrest the attention of children. Our annual anniversaries, which bring to the Great Metropolis so many ministers of different denominations, are fruitful examples of the strong memories of children in this respect. With the familiar faces of the clergymen who ministered before him in holy things in his boyhood, come back to the city denizen fresh memories of his early life in the country; the plain village church, with its farmer-occupants; the "tidingmen," who used to pull his ears and make him change his scat when he was restive under the delays and restraints of the sanctuary. "Do you see that white haired old gestleman?" said a friend to us in the crowded. Tabernacle, at a late religious anniversary, pointing to a venerable clergyman, the personification of soleun dignity. "He was our minister in the country nearly forty years ago, and he was called old Mr. L.— then. How well I remember his baptizing my little sister! and it seemed but a dream of time afterward, when I saw him marry her to a young man who had won her heart; and in less than two years afterward he uncovered his white head at her grave, and endeavored to speak words of consolation to her bereaved friends. The last time I heard him in the country was at a conference meeting, on a summer afternoon, at the little school house; and well do I recollect how, as the late twiight drew on, and I was looking out upon the deepening green of the treethat surrounded the humble building, his voice trembled with emotion as he read the parting hymn:

"The day is past and gone;
The evening shades appear;

"The day is past and gone;
The evening shades appear;
Oh, may we all remember well.
The night of pears draws near

"' We lay our garments by,
Upon out beds to rest;
So marm will soon directe us all
Of what we here possessed."

"I should like," continued our friend, as we walked home to die, when it shall please God to call me away and have that good old man, the friend and director of m

By C. W. BOTTELER, Auctioneer.

ALCITION.—On Monday, July 21, at 6 o'clock, p. m., I shall sell on the premises part of lot No. 2, in square 282, together with the improvements thereon, consisting of a four-story brick dwelling, &c. This property is located on Ninth street, immediately opposite Centre Market.
